

**MONITORING
STEAM BOILER
WEB SYNOPTIC**

ACCESS MODE:

Access to the webpage is made from www.eterm.it

The site is optimized and constantly updated for the Google Chrome browser

Currently there are no problems for

- Mozilla Firefox
- Safari

There were no problems with the main browsers on tablets and smartphones, however the display of graphs, for historical data, could be problematic for smarthphone.

From the home page of the website, click on etermEASYmanager

Enter the access credentials provided.

The image shows a login form with two input fields: 'Username' and 'Password'. Below the fields is a button labeled 'entra'. At the bottom of the form, there are links for 'Registrati' and 'Password dimenticata?'.

Unless otherwise communicated or agreements, credentials can be obtained from the window  of touch screen display of the boiler control panel:

- 1 username: is the sum of ID eterm and ID installation with "_" between the two (example ECOVAP1_ET00099)
- 2 password: is the ID installation (example ET00099)

Select from the available systems the one you want to view.

HOME PAGE

Once the page is displayed, click on Connect and wait (up to 120 seconds) for the data to start arriving from the boiler room.

After pressing "Connect" the button will become "Disconnect" and will be used to terminate the connection.

The page and the data displayed depend on the accessory of the boiler

Press  to access the complete list of modifiable values.

Enter the new value and press Save

ALARM PAGE

To access the alarm page, press:

Pressing the **Alarm** button the list of possible alarms is displayed:

Pressing on a single alarm any alarms that occurred in the past is displayed. (wait a few moments for the information to load)
